SUBJECT: GMO FREE declaration

Dear Customer,

we kindly inform you that the vegetable seeds commercialized by ISI Sementi Spa have been obtained by traditional breeding methods without using any genetic modification technique or any genetically modified material, as specified in the Directive 2001/18/EC concerning the deliberate release of GMOs into the environment.

The methods used to obtain and produce those varieties include procedures aiming at achieving high standards of purity and avoiding the presence of off-types and GMOs.

Seeds are produced in compliance with law requirements concerning commercialization of seed varieties and with seed production rules, including the agreed isolation distances.

It is appropriate to point out that, despite what mentioned above, the risk of accidental contamination in seed multiplication areas cannot be completely excluded, therefore we decline all responsibility for any possible damages that could derive from that.

Kind regards,

ISI Sementi Spa
